Note: On MFX-2000s, F-150s and F-95s, and on F-120s manufactured before the cut-in of the RISC microprocessor (serial numbers lower than 90100000), memory is added 2MB at a time by adding individual 2 MB PCBs.
All specifications are subject to change without notice.

* MFX-2500 memory can be configured in these quantities:

Memory	16 MB (Standard)	24 MB (16+8)	40 MB (16+24)	56 MB (8+24+24)
Total Storage	1,330 pages	2,010 pages	3,370 pages	4,730 pages

Memory Configurations for F-Series

Model	Base Memory	Upgrades					Part Number
		2 MB	4 MB	6 MB	8 MB	Max.	
F-160	2 MB, 140 pages	4 MB total, 300 pages	6 MB total, 460 pages	N/A	10 MB total, 780 pages	16 MB total,* 1260 pages	2 MB Memory PCB D71A809240 4 MB Memory PCB D71A809140 8 MB Memory PCB D71A809040

F-95E	1 MB, 64 pages	3 MB total, 192 pages	5 MB total, 320 pages	7 MB total, 448 pages	N/A	N/A	2 MB Memory PCB F95002MGPCB 2 MB Memory Chip F95002MGIC
F-65	1.3 MB, 114 pages	N/A	N/A	N/A	N/A	N/A	N/A

16 MB maximum memory configuration, when two 8 MB memory upgrades are added. When two 8 MB memory chips are added to the F-160's base 2 MB memory, the total memory available for document storage is limited to 16 MB or 1260 pages.

On the F-95, an additional board is required to accommodate the first 2 MB upgrade; additional 2 MB chips are then added to this board.

On all other memory upgrades shown except for the F-160, customers may choose to add either a 2 MB, 4 MB or 8 MB upgrade PCB. Only one memory upgrade PCB can be installed on these units.
