

TrackpadTM

Parcel Tracking System

Full Color Handheld Computer

Full color display now makes Trackpad even easier to use!

Say "goodbye" to hard-to-read screens. Parcel tracking systems are entering a whole new era with Trackpad's color HPC. Moreover, a processing speed of 150 MHz means this sleek unit is twice the speed of our previous model and five times the speed of competing systems' HPCs. A unique bar code scan card integrated into the HPC creates a high-performance, non-contact laser scanner. Built for workers on the go in a rugged workplace environment, our color HPC has action control buttons for one-hand operation, and it has been splash and drop tested in the field.

Trackpad's portable handheld is the core of on-the-go tracking

- 32 MB of memory and dual battery redundancy assure data integrity.
- Utilizes digital signature capture or mail stop scanning for proof-of-delivery.
- Soft keyboard input for easy data entry using drop-down lists and smart search techniques.
- Wireless data transfer using infrared (IrDA) eliminates need for plug-in connection.

What reviewers are saying about the HPC:

"The unit is **sleek, very sleek**, and a pleasure to hold in one's hand."
Pocketnow.com

"...most compelling is the fact that it is *ruggedized*. By "ruggedized," I mean that the unit is housed in a rubber tire-like casing, which is **virtually waterproof and shockproof**. I loved that I didn't have to worry all the time about breaking the HPC." *www.windowsce.net*

The backup battery provides up to 24 hours of time in order to get another main battery in place...Casio has **an industrial winner**... *BrightHand*

Features you'll appreciate:

- Full color display that's bright and easy to use
- On board, non-contact laser scanner
- One-hand operation
- Rugged leather case with belt clip and shoulder strap
- Built for the rugged workplace
- Splash and drop tested to 30 inches
- 23°F to 122°F operating temperature

Specifications:

OS version: Pocket PC with Windows CE 3.0

CPU: NEC VR4122 MIPS @ 150MHz

RAM / ROM: 32MB / 16MB

Size & Weight: 3.35 x 5.31 x 1.02 inches, 10.41oz

Display: TFT, 240 x 320, 65536 colors

Communications: IrDA

Input: Touch screen

Battery Life: Li-Polymer - small, 4 hours; medium 7 hours; large, 13 hours

Expansions: Compact Flash Type II
